

CITY MEET SCRATCH/ADD

(6/25/09)

While there is no official scratch/add date, you have until Sunday, July 5 at 12:00 noon to make any desired changes to your entries. You may make ANY changes you wish to your original entries.

If you make changes:

1. Export the entries and email them to records@swimrcsl.org (by 12:00 noon Sunday, July 5).

Bring to Jones Valley Pool:

1. A new printed copy of the Meet Entry Fees.
2. A check for any difference in the amount calculated on the original Entry Fees Report and the new Entry Fees Report.

NON-EMERGENCY LATE ENTRIES

(entries occurring any time after Sunday, July 5, 12 noon)

We understand there are always situations where a swimmer is inadvertently omitted from being entered or one that had originally planned on not swimming and suddenly wants to swim. We will accommodate any and all Non-emergency late entries under the following conditions:

1. The event the swimmer is being entered in currently does not have three swimmers from your team entered in it. No switching of one swimmer for another in any event.
2. There must be an available lane for the swimmer to swim. There will be no re-seeding and new heats will be added.

EMERGENCY SUBSTITUTIONS

We understand situations will arise when a swimmer becomes ill or some other accident prevents a swimmer from competing. Emergency substitutions will be evaluated and accommodated by the Meet Director as they arise under the following conditions.

1. Reasonable proof must be presented that the swimmer being removed has a true emergency.
2. The swimmer is then removed from the entire meet.
3. The swimmer who is replacing the one being removed must already be entered in the meet and is not already swimming three events. What this means is that we will not allow a "cascade" of substitutions to fill events vacated by swimmers. What this generally means is that if the removed swimmer is entered in three events it will more than likely take three swimmers to fill his/her events.
4. The new swimmer will swim in the same heat and lane as the removed swimmer for each event.
